Re: Permit #89-02

Dear Mr. Sinclair:

This letter is provided to inform you of Tenneco Minerals Company's decision to terminate use of its solid waste landfill. This dump was permitted on January 27, 1989 (Permit #89-02).

Tenneco has used approximately .25 acres of the landfill for disposal of paper/office waste. At no time were any hazardous wastes deposited in this landfill. In July 1991, Tenneco Minerals covered the final excavated trench with 4' of spoil and contoured the area.

Currently, dumpsters are located on-site and the paper waste generated at the site is contract hauled (through Laidlaw Waste Systems) to the Washington County landfill. Approximately two 30 cu yd dumpsters are hauled each month. The dumpsters are covered during transit.

Upon notification of receipt of this letter, Tenneco Minerals will proceed with final topsoiling and seeding of the dump area and access road this fall.

Please advise me of any concerns.

Sincerely,

TENNECO MINERALS COMPANY

Ken A. Kluksdahl  
Mine Manager
